## CLAIMS

Please cancel claims 1-15 without prejudice or disclaimer as to the subject matter thereof.

1.-15. (canceled)

16. (Original) A capacitor cell, comprising:

a pressed, sintered and formed, powdered metal anode member having a pair of substantially flat, major opposing sides; and

a portion of track-etch material disposed on at least one of said pair of substantially flat, major opposing sides of said anode member, said portion of track etch material having a surface area approximately the same as a surface area of said anode member.

17. (Original) A capacitor cell according to claim 16, wherein said anode member comprises tantalum.

18. (Original) A capacitor according to claim 16, wherein said anode member comprises a one of: a D-shaped member, a C-shaped member, an ovoid-shaped member.

19. (Original) A capacitor according to claim 16, further comprising a second portion of track-etch material disposed on the other of said pair of substantially flat, major opposing sides of said anode member.

20. (Original) A capacitor according to claim 16, wherein said portion of track-etch material comprises a unitary sheet of material and has a surface area approximately twice that of the anode member and wherein said portion of track-etch material is folded around and substantially surrounds said anode member.
